An eye anywhere

**Direct videostreaming of calamities viewable at station becomes a success.
Our demonstration-vehicle visits you!**

Ruinen, July 24th 2009

Dear Sir / Madam,

The Fire Department of Meppel started using the BySpy Video Surveillance system in 2008 for streaming Live-images from a remote location to the station. Since then the system has grown to a complete Video- and Sensor security system for safety and training.

Following the successful workshops/demonstrations **'Live-view grows to a complete system for safety and training'** we have decided to give Live demonstrations with our demonstration-vehicle at your location in the Netherlands.

What can you expect during the demonstration at your location:

- Presentation and explanation video system for Fire Departments and Police Force.
- **Live demonstrations of video transmission from our vehicle via GPRS/UMTS/WiFi or Satellite.**
- Newest developments and possibilities for your organisation.

With sufficient attendance we gladly visit you at your location.

There are no costs involved and the duration is about 2.5 hours.

You can make an appointment by replying to this emailaddress (verkoop@byspy.nl) mentioning the number of persons and your contact information. You can also call us at +31 (0) 522 473432 to see which dates are available.

Best regards,

BySpy Salesteam

PS For more information about the mobile video- and sensorsurveillance products, see our website for the [Fire Department](#) or [Police Force](#).
